

Show the World How Much You Love BJs

By: David Fingland on Oct. 12, 2015

We've gotten a lot of requests to do a sports article. Now, I love rounding the bases as much as the next guy, but I've never really followed the sport of baseball religiously. With the Toledo Blue Jays winning their first division title in a long while (a loooooong while), it seems like the opportune time to jump on the bandwagon.

After some research I'm ready to sit down and enjoy the merits of following a 'successful' franchise, without having to deal with any of the crushing heartbreak a true fan may suffer.

If you are ready to punch your ticket to board the Jays playoff hype train, settle down to watch some sick bunts and what-not, then I've got an excellent guide to help you become a true, blue, bandwagoner.

1. Give the Blue Birds a quick Google, so you can tell people you've been a fan since back in the good ol' Roy Halladays.
2. Pick a favourite player. I suggest Donaldson, so you can go to a bar and yell MVP at random people. Or Kevin Pillar, because he's got the chin, eyes, and gluts of some minor Greek deity.
3. Grab some Jays' gear. Preferable not a jersey, you don't want to commit too hard here. Keep it under 40 bucks people.
4. Take a real cute profile pic, and a couple Instagram-aroos with said swag incidentally present. Take my word for it, the inclusion of such merchandise will net you an average of ten extra likes per post. After all, it isn't easy being a bandwagoner, milk it for all it's worth.
5. You don't actually have to watch the games, you can change the channel whenever your roommates leave, they won't be any the wiser. Just look up the scores after Gilmore Girls or something.

If they manage to win the ~~superbowl~~ ~~world-cup~~ Commissioner's Trophy or whatever, you are now qualified to vaguely mention being a fan for some time. That'll win you some brownie points at dinner with your drunk uncle Frank.

"Let me tell you how the sport was different and better while you get me another beer," Druncle Frank.
